

Hurfords superior kiln drying process helps to minimise lamella movement to help prevent twisting, cupping and checking. This sets us apart from the rest in the market.

**AUSTRALIAN NATIVE**  
BY HURFORD FLOORING

## Emphasising two of Australia's much loved classic species, Blackbutt & Spotted Gum.

Australian Native provides that organic, natural, warm feeling. The pre-finished range features a square edge profile and an ultra matt finish, to achieve a floor that's earthy and effortless. Manufactured using a low shrinkage and eco-friendly Hevea as the core material and a tough Australian hardwood lamella for the wear layer, produces a product that's consistent in quality and structural stability. Australian Natives construction also incorporates a licensed Välinge click system, using a single action installation method, which saves time and ensures you can enjoy your new floor instantly.

Utilising the latest in environmentally friendly UV coatings, our 6 coat system delivers a floor finish similar to a stylish oiled floor but with the durability and protection a UV lacquer offers. Australian Native engineered flooring provides a practical yet stylish option suited for day-to-day use in most applications.

Also available, in addition to our Blackbutt and Spotted Gum, the Australian Native range offers Rustic Blackbutt. A full featured floor with prominent gum veins, gum pockets, trails, burls and borer holes. The feature does not interfere with the structural integrity of the floor, but offers a glimpse of the intense life in the Australian Bush; drought, ambrosia attack and fierce wildfires are just some of the elements a tree needs to endure to produce these beautiful and interesting features. An impressive choice, adding value and character to any interior.
