

metallon™

A decadent synergy of contemporary aesthetics blended with the earthy beauty of wood.

care and maintenance

An advantage of Boral metallon™ engineered flooring is the ease of maintenance and cleaning it requires. However like all things regular maintenance and care will ensure a lifetime of beauty.

These tips will help ensure your floors longevity:

- For daily cleaning, use dry methods such as vacuuming and sweeping. To remove stubborn dirt, use a well-rung mop and a pH neutral cleaner. Do not clean timber floors with a steam mop.
- Place doormats at entrances, non-slip rugs in high-wear areas and protective pads under furniture legs.
- Do not use abrasive brushes, steel wool, soap detergents or ammonia based cleaners.
- Take care when moving appliances and furniture by placing them on a sturdy mat to slide into position.

our environment

Boral Timber products have full Australian Forestry Standard (AFS) Chain of Custody certification, verifying that Boral Timber products are produced from certified, legal and sustainable resources.

AFS certification is linked to the worlds largest forest management certification scheme (PEFC) and is the only Australian forest management certification scheme with an Australian Standard (4708-2007).

For full Boral metallon™ engineered flooring installation or care and maintenance information, please contact Boral Timber on 1800 818 317 or visit www.boral.com.au/timber

Boral® and Build something great™ are trademarks or registered trade marks of Boral Limited or one of its subsidiaries. Note: Variations of colour within a timber species are normal, therefore photographs, samples and display floors can only be indicative of the colour range of the timber species nominated. Timber is a natural product and commonly reacts to changes in atmospheric conditions such as humidity and temperature. This is considered normal. It is recommended that these species are viewed at a timber flooring showroom before a decision is made on colour.

Specifications

metallon™

Boral metallon™ engineered flooring envelopes the earthy beauty of timber flooring and contemporary aesthetics of precious metals, creating a synergy that is truly decadent.

With click lock installation, metallon™ seamlessly integrates into your space. Pre-finishing minimises the extra work required and allows for versatility with its ability to be sanded back to reveal a more natural blackbutt or spotted gum finish.

features

>> Available in two beautiful Australian hardwood species : Spotted Gum and Blackbutt

>> No mess and fumes from sanding and finishing

>> Low sheen high quality European UV cured acrylic lacquer

versatility and design

With trends constantly changing, metallon™ allows you to be able to go from trendy modern colours back to the beautiful traditional wooden floors perfect for Australian lifestyles. Each of the contemporary metallon™ products is constructed with a nominal 4mm Australian hardwood being either Spotted Gum or Blackbutt selected for their natural beauty and density, a characteristic of Australian hardwoods.

engineered perfection

Prefinished and incorporating the Uni-clic click-lock system, metallon™ is the perfect minimal fuss yet stunning engineered timber flooring solution. Backed with a 25 year domestic warranty, metallon™ is the first range of stained Australian hardwood engineered floor. For full Warranty details visit: www.boral.com.au/timber/metallon-warranty.
